P R E S E N T S

The Aura *Experience* on **vm**ware®

CRI is leveraging Avaya Aura and taking it to the next level with IS-Aura. The flexibility of our deployment options along with the numerous application combinations allows us to create the Integrated Server that specifically meets your needs.

Aura Simplifies collaboration and delivers cost savings and a smart, evolutionary path for your existing communication and now that we have virtualized it the benefits are numerous.

Unique Benefits:

- Industry leading flexibility, scalability and reliability
- Cost savings derived from simplified usage and access
- Open standards and third party solutions integration
- Migration paths defined for the unique needs of an enterprise

Deployment Options:

- VM staging only (no implementation of the application software)
  • Can do this on a per VM basis or a bundled basis
- Full implementation (VM stage & implementation of application software)
  • Either priced out in a ala-carte fashion
  • Or special bundle price

Software Components:

- Avaya Aura:
  • Communication Manager
  • Session Manager
  • System Manager
  • Presence Services
  • AES
  • Utility Services
  • WebLM
  • SAL
- VMware ESxi 5.x
